

Freedom System Architecture

This is a brief overview of the Freedom systems architecture, which answers some of the most commonly asked questions regarding user interaction and system requirements.

THE FREEDOM SERVICE

Your Freedom Account is managed from a centralized server at a professional hosting facility. Having the main processing servers under DNA control allows us to lower the expense of setup and reduce deployment time.

ACCOUNT ADMINISTRATION

DNA first creates the schools website which includes a customized website template, pre-developed content, and a Freedom School Site Administrator account. School Site Administrators have the ability to add, modify, and delete Freedom Teacher Website accounts as needed through an easy-to-use interface.

FTP administration is a common source of concern. Once the initial FTP account is created, all further FTP activity is handled by Freedom, removing any need for user administration.

CHECK-IN CHECK-OUT PROCESS

Freedom accounts are managed through a check-in check-out process. This prevents other maintainers from checking-out the website while you are working on it, avoiding overwrites.

AUTOMATED SOFTWARE UPDATES

Freedom automatically checks to make sure you are using the most current available version of the software. If you do not have the most current version, Freedom will update your system for you.

UPDATES & ROLLBACKS

All updates are recorded and then stored on our server. We keep records up to 5 generations back. If any unwanted changes or updates occur, a rollback can be performed in order to retrieve any data that has been accidentally lost.

WEBSITE HOSTING

When it comes to website hosting there are no restrictions. We can host your website, you can have your website hosted by any third party, or you can host it on your own servers. The only thing that we require is a dedicated directory for your Freedom website and an active FTP account to that directory.

If you do not have a server you are currently hosting on, or you are thinking about outsourcing your hosting needs, keep in mind that DNA offers professional hosting services at a very reasonable price.
